Subject: Request for Permission to Organize a Coding Workshop

Dear Sir/Madam,

I hope you are doing well. I am writing to request permission to organize a Coding and Programming Workshop for the students of our department. The main objective of this workshop is to help students improve their programming knowledge, understand practical applications of coding, and develop problem-solving skills that will be useful for their academic and professional careers.

In today's technology-driven environment, programming skills have become increasingly important for students pursuing Computer Science and related fields. Although students learn programming concepts as part of their regular curriculum, a practical workshop would provide an opportunity to apply these concepts through hands-on activities and real-world examples.

The proposed workshop would include sessions on programming fundamentals, problem-solving techniques, basic data structures, debugging, and an introduction to software development. Students would also be given small coding challenges and practical exercises so that they can apply what they learn during the sessions. The workshop could be conducted with the support of faculty members and experienced student volunteers.

We are planning to conduct the workshop on a convenient working day so that it does not interfere with regular academic activities. We will ensure that the required arrangements, including the computer laboratory, seating, internet connection, and necessary software, are properly organized before the event.

I kindly request you to grant us permission to conduct this workshop. We believe that it will be a valuable learning experience for students and will encourage them to take greater interest in programming and technology.

Please let us know if we may proceed with the planning and further arrangements. I would be grateful for your guidance and support in organizing this event successfully.

Thank you for your time and consideration.

Yours sincerely,

Charan Godhuma
